At Prouvé we love beautiful fragrances...

and we know that they are a very important part of our lives.

These are the things that trigger a lot of emotion. Nothing is as good as it in bringing back memories. They affect our mood and well-being and, in many cases, the choices we make. And finally, they are an invisible accessory that makes people remember us for a long time.

Fragrances have great power, that is why we are always fascinated by their amazing world. We keep discovering its secrets, which we then share with you. We want delightful aromas to accompany you in every situation, so we close them for you not only in perfume bottles, but also in cosmetics and cleaning products. Surrounded by them you will make your life even more beautiful.

Browsing through this catalogue you will find many products, including unique novelties that will allow you to take care of yourself and your home effectively and easily, make it easier for you to perform your daily duties and of course have a fantastic fragrance. We have created new fragrances for her and for him, which charm with their captivating compositions. We've expanded Simply Pleasures to include a range of cosmetics that will help you take care of your hair in a comprehensive way, and these will pay back with a great look. And in the Make Me Up series, you'll now also find a multifunctional micellar liquid that will take care of your skin.

SIMPLY PLEASURES

How to take care of yourself in a few steps?

Drawing from the philosophy of discovering happiness in seemingly ordinary activities, we have designed a collection of fragrant the SIMPLY PLEASURES body and hair care cosmetics. The idea about it is to be here and now, to cultivate relationships, to find time for oneself and others.

We know that properly moisturized skin and healthy and shiny hair are the basis for a good look, so we give you products rich in active ingredients, with an exceptionally pleasant consistency and beautiful fragrance, composed of French oils. Our cosmetics will not only take care of you, but will also have a beneficial effect on your mood and turn everyday care into an extraordinary ritual.

Focusing on beauty and care, and not on gender, we have set the UNISEX trend. There are only benefits to this solution: by using the same products together, we save time and money, save space in the bathroom and care for the environment. There's something else we've discovered: sharing cosmetics brings people closer together.

Do you know
the secret
to having
velvety

For the skin to maintain its smooth and young appearance, it needs intensive cleansing. The systematic removal of dead skin cells during a relaxing massage in the shower or bath is a great way to make the skin more firm and to strengthen it. It is with this in mind, that the

DAILY MOISTURISING BODY SCRUB

was created, which perfectly cleanses and conditions the skin. The body scrub contains finely ground apricot kernels that stimulate microcirculation and ensure the skin is perfectly smooth, while the plant compounds help to keep the skin properly hydrated. Thanks to the content of original French essential oils, the scrub has a beautiful, sensual fragrance that will allow you to detach yourself from reality for a while.

How does the invisible glove work?

We pull them out to greet others and we touch our loved ones with them. No wonder we want our hands to look beautiful and well cared for. To make sure they're always pleasant to the touch and velvety smooth, we have developed the

DAILY MOISTURISING HAND CREAM

whose active ingredients act as an „invisible glove“, wrapping the skin and protecting it from dryness. The cream leaves a subtle film on the skin reinforcing the protective barrier of the skin.

WHAT IS TEWL?

TEWL stands for transepidermal water loss. This is a most natural phenomenon, helping to maintain, among others, the right body temperature, however, when not under control, it can lead to premature aging, dryness and roughness of the skin. Fortunately, contemporary cosmetology knows some great ingredients which help to reduce it: **Xeradin™** and the fig prickly pear extract. Both of these ingredients can be found in our Simply Pleasures line of body care products.

DAILY MOISTURISING HAND CREAM

50 ml

symbol: 204001

♥ What you will love it for:

its active ingredients form an „invisible glove“ on the palm of your hand that protects the epidermis against water loss. Thanks to this, the skin of your hands is better moisturized, smoother, and firm.

💡 What is our secret:

the combination of a complex of five algae with an extract from fig prickly pear and Canola oil.

💧 What will delight you about it:

you will feel its effect after just one application.

🚫 What will make you not want to trade it for any other:

You will experience first hand the effects of the rich composition, that not only moisturizes the skin, but also regenerates it.

🔍 What else are we proud of:

we have created a cream rich in moisturizing ingredients, but extraordinarily light and non-greasy in texture. This is essential for us because we do not like having moist or greasy hands.

🌸 What is that beautiful scent:

blackcurrant, rose, lily of the valley, moss, musk and cedar wood.
