How to **dazzle with your eye** makeup?

Holographic glimmer became a fashion trend several seasons ago and it still dominates. HOLO glitter invariably is a sensation and works great when used on a daily basis, as well as at parties, where the light additionally highlights the effect of shimmering multicoloured particles! In the case of holographic accents in makeup, however, you need to keep moderation. It's enough to emphasize one element so that the effect is electrifying. With the

HOLOGRAPHIC EYE STYLIST PENCIL

we focus on using the HOLO style on the eye. Sapphire, or maybe emerald green? The colour is up to you. What counts above all is the sparkle, and a multi-coloured effect that changes and surprises, depending on the angle of incidence of light and its intensity.

♥ What will you love it for:

for the fact that thanks to the high content of pigments and the excellent intensely covering formula you can create a multi-dimensional makeup with a holographic effect in vigorous, iridescent colours. Such makeup will enhance and highlight the colour of your iris and will certainly draw attention to your eyes.

♥ What will delight you about it:

the long-lasting effect, the fresh, strongly saturated colour that lasts for many hours and its waterproof formula. Your make-up will remain brilliant, vivid and luminous despite the passage of time. The pencil does not crumble, does not rub off and does not smudge on the eyelid.

👉 How to use it:

twist the pencil up and with a smooth stroke draw a line at the upper lash line. To keep the pencil point perfectly sharp, use the built-in pencil sharpener.

? What else should you know about it:

the pleasant, creamy texture of the pencil makes it extremely easy to apply and it spreads smoothly on the eyelid. It only takes one stroke with the pencil to get a spectacular effect, multi-dimensional colour and full coverage.

♻️ What will provide you with additional safety:

the hypoallergenic, gentle formula is also recommended for women with sensitive eyes and those wearing contact lenses. We also made sure that it was ophthalmologist tested.

TIPS:

When using the pencil, remember to follow a few rules:

- after application, wait a few seconds for the effect to become permanent,
- with this pencil you can easily get the desired effect on your eye:
 - for the big night out, a thicker, stronger, and clearly marked line
 - after sharpening, a precise, thin line ideal for everyday styling,
- for artistic, New Year's and carnival makeup, you can use the pencil to draw small decorative elements on your face, such as geometric shapes or fashionable animal motifs such as spots.
